See for yourself!*

Introducing the New iNodeView™

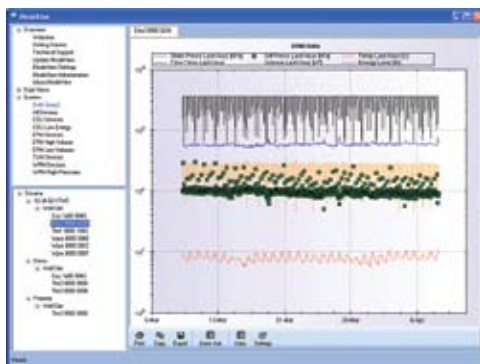

Data Access & Analysis Tool Only From Ferguson Beauregard

iNodeView's interface is easy to use and eliminates confusing menus and tool bars.

Ask questions about your data using robust and powerful queries.

Analyze your data with rich tools, including graphs, dashboards and spreadsheet grids.

Ferguson Beauregard's iNodeView, is a powerful new software platform that maximizes your investment in the iNodes well monitoring devices.

iNodeView allows you to:

- View data as soon as it is collected by your iNodes devices
- Ask questions about your data using robust and powerful queries
- Analyze your data with rich tools, including graphs, dashboards, and spreadsheet grids
- Export your data to other applications like Microsoft Excel or Word.

iNodeView's functionality is presented in an easy-to-use interface that eliminates confusing menus and tool bars. You can access all the features of iNodeView from the navigation tree located in the top left corner of the application. View your data, create new queries, update your software, even contact technical support: everything can be accomplished with simple clicks in the navigation tree.

View data as soon as it is collected by your iNodes devices.

For more information, contact your local field technician, or call our main office.
